# Connecting your Packetized-Enabled Webasto Aerovironment EV Charger

Disclaimer: By completing this process, the user is specifically granting authority to Burlington Electric Department to access all charging data and/or conduct load management on the home electric vehicle charging station per the terms set by the Burlington Electric Department (BED) program.
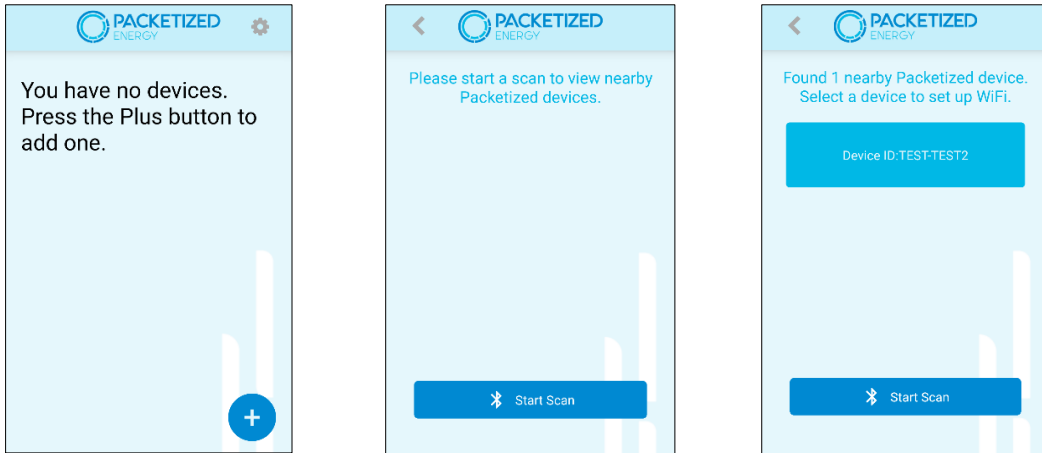

Below are the steps for connecting a Packetized-Enabled Webasto Aerovironment charger using the Packetized Energy mobile app for participation in BED's EV Rate. These steps should be followed after you have purchased and installed a Packetized-Enabled Webasto Aerovironment charger.
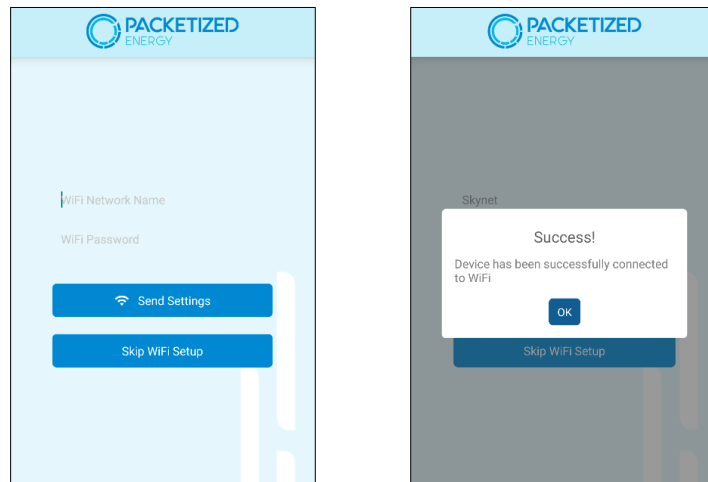

Things you'll need:

- Your smartphone
- Your BED Customer and Location ID, found on any recent electric bill.
- Your WiFi login information

1) Download the Packetized Energy App from the Apple Store or Google Play. Turn on Bluetooth and location services on your phone.

2) Open the app and select "Login". If you do not have an existing Packetized Energy account, select "Sign Up". If you have an existing account, click "Log In" to enter your information.
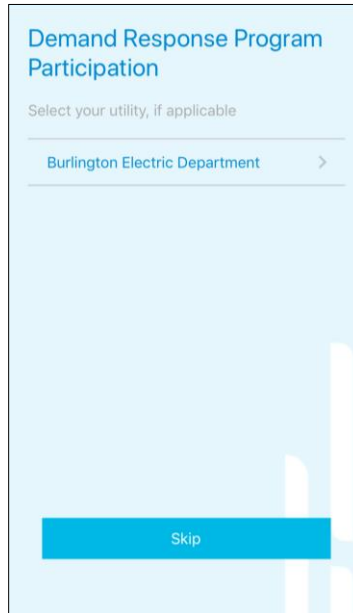

3) Once signup is complete, select the plus button at the bottom of the screen to connect your EV charger to your account.
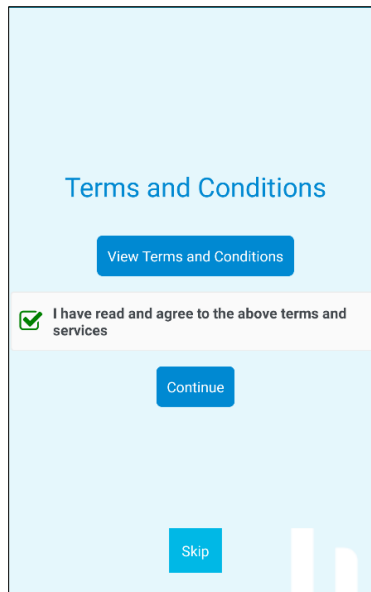

4) Hold down the "Start" button on the front of your EV charger for 20 seconds to begin broadcasting the Bluetooth signal. The signal will remain on for 5 minutes. Select "Start Scan". The device ID will appear in the device list. Select the device. When prompted to enter the authorization code, enter the six-digit number on the sticker on the front of your device.

5) Enter your WiFi credientials as prompted and click "Send Settings". If the credentials are entered correctly, you will receive a "Success!" prompt. Click "OK" to continue.
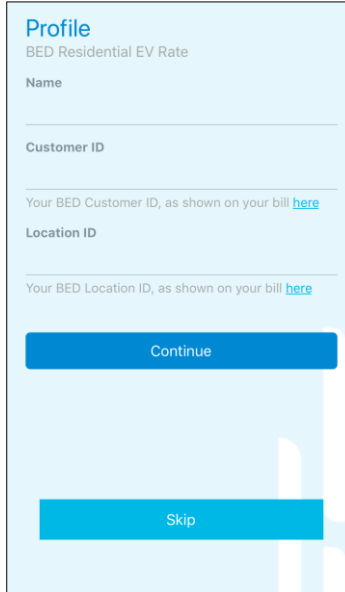

6) Select Burlington Electric Department from the Demand Response Program Participation list.
