

# Select ENERGY STAR® Certified Smart Thermostats Eligible for Up to a \$100 Mail-In Rebate through 6/30/2018

## Eligibility Details

Limited to two rebates per Vermont residential electric account.

Efficiency Vermont rebates are evaluated on a regular basis throughout the year to determine if program can continue for next cycle.

Rebate offer only available to residential electric utility customers in Vermont.

Requires minimum customer contribution of \$50. If purchase price is under \$150, the rebate amount will be prorated.

## ENERGY STAR Certified Smart Thermostat Device Criteria

Criteria		Performance Requirement
Static temperature accuracy		≤ ±2.0 °F
Network standby average power consumption		≤ 3.0 W average
Time to enter network standby after user interaction (on device, remote or occupancy detection)		≤ 5.0 minutes
Annual % run time reduction, heating	Lower 95% confidence limit of weighted national average*	≥ 8%
	Weighted national average of 20th percentiles**	≥ 4%
Annual % run time reduction, cooling	Lower 95% confidence limit of weighted national average*	≥ 10%
	Weighted national average of 20th percentiles**	≥ 5%
Average resistance heat utilization for heat pump installations		Reporting Requirement

In order to demonstrate compliance with these energy saving criteria, smart thermostat service providers use EPA-provided software to analyze and combine a year of data from hundreds of their customers' homes, reflecting how the thermostats were actually used, to calculate national savings metrics for heating and for cooling.

\*The lower 95% confidence limit is similar to an average but takes into account the chance the particular homes that were sampled were all higher savers.

\*\* The 20th percentile means that 4 out of 5 homes in the sample saved at least that much.

### SPECIAL NOTICE PLEASE READ

On December 1, 2017 Efficiency Vermont will switch to ENERGY STAR as the exclusive means to qualify for our program. Thermostats that are not certified to ENERGY STAR will remain on the QPL for purchases made on or before 12/31/2017. Efficiency Vermont is in conversation with the manufacturers who are not currently ENERGY STAR certified, and hopes that they will be able to certify their products as soon as possible. We will continue to update the list monthly as new models become certified to ENERGY STAR.

## Qualifying Models

Updated 12/28/2017

For most up-to-date list of qualifying products, please visit [efficiencyvermont.com](http://efficiencyvermont.com)

<sup>1</sup> Asterisks (*), plus signs (+), or pound signs (#) indicate that any variable may be used in place of the symbol.						
<sup>2</sup> All products will be listed as eligible <i>until the end of the current rebate cycle</i> , unless a model is delisted. Following delistment, the following month's Qualified Product List will list a new 'For Purchases Made Before' submission deadline for the delisted model.						
Indicates recently discontinued model			Indicates recently delisted model		Indicates newly added model
